Attention deficit hyperactivity disorder (ADHD) is a mental disorder of the neurodevelopmental type. It is characterized by difficulty paying attention, excessive activity, and behavior without regards to consequences which is not appropriate for a person’s age. There are also often problems with regulation of emotions. The symptoms appear before a person is twelve years old, are present for...
Three position statements have been developed by the Canadian Paediatric Society following systematic literature reviews. Statement objectives are to 1. Summarize the current clinical evidence regarding ADHD, 2. Establish a standard for ADHD care, and 3. Assist Canadian clinicians in making well-informed treatment decisions.

Attention deficit hyperactivity disorder (ADHD) is a neurodevelopmental disorder characterized by difficulties with attention or more commonly, concentration. It may be accompanied or not by hyperactivity or impulsivity. It exists in the neurodevelopmental disorder ADHD in English. ADHD is a brain disorder.
