Business Intelligence Optimization For Decision Making

Keywords: Business Intelligence, Decision making, Optimization techniques, Genetic Algorithm, Ant Colony Optimization.

1. INTRODUCTION

Business intelligence, or BI, is an umbrella term that refers to a variety of software applications used to analyze an organization’s raw data for intelligent decision making for business success. Business intelligence, Wikipedia Business intelligence BI comprises the strategies and technologies used by enterprises for the data analysis of business information. BI technologies provide historical, current, and predictive views of business operations. Common functions of business intelligence technologies include reporting, online analytical processing, analytics, data mining, process mining, complex event processing.

Decision Intelligence, Wikipedia Decision intelligence is an engineering discipline that augments data science with theory from social science, decision theory, and managerial science. Its application provides a framework for best practices in organizational decision making and processes for applying machine learning at scale. The basic idea is that decisions are based on our understanding of how actions lead to outcomes.
