Introduction to RF Engineering • Radio Astronomy is the “Leco” of RF languages spoken by comparatively very few people • Successful coordination is much more likely to occur and much more easily accommodated when the parties involved understand each other’s lingo RF and Microwave Wireless Systems materias fi uba ar All of these wireless systems consist of a radio frequency RF or microwave front end Although many new wireless courses have been offered at universities and in industry there is yet to be a textbook written on RF and microwave wireless systems The purpose of this book is to introduce students and beginners to the general Code Division Multiple Access Technology eff org CDMA Architecture – Cell Breathing CDMA is a noise generated technology As such the system must monitor its noise floor or ambient noise To much noise will cause interference leading to degraded service or dropped calls CDMA systems are equipped with a protocol that allows the system to adjust in these situations RF circuit design Basics Matsuzawa and Okada Laboratory SFDR Spurious free dynamic range The input power range over which third
