Comprehensive Management Of Head And Neck Tumors 2 Volume Set

*FREE*

In a survey of all female U.S. radiation oncology residents in 2017-2018 with 125 respondents (74% response rate), half agreed that gender-specific bias existed in their programs and a quarter reported experiencing sexual harassment. Half reported that lack of mentorship affected career ambitions, and 90% expressed interest in joining a professional group for women in radiation oncology.

International Journal of Radiation Oncology

Probability Radiation Dose

In a systematic review of the available literature addressing the dose volume data for tumor control probability with SBRT in patients with locally recurrent previously irradiated head and neck cancer data from more than 300 cases in 8 publications suggest that there is a dose–response relationship with superior local control and possibly improved overall survival for doses of 35 to 45 Gy. Evaluation of the benefit and use of multidisciplinary in the complex treatment path for patients with head and neck cancer multiple specialists will provide input into the treatment plan. A team approach is designed to provide all patients with a carefully determined treatment plan focused on providing the most comprehensive effective care possible.

Journal of Vascular Surgery

Home Page

Journal of Vascular Surgery® is dedicated to the science and art of vascular surgery and aims to be the premier international journal of medical endovascular and surgical care of vascular diseases. Since the first issue was released in 1984 the goal of the journal has been to improve the management of patients with vascular diseases by publishing relevant papers that report important advances.

Clinical Practice Guideline Allergic Rhinitis

Michael D

Objective

Allergic rhinitis AR is one of the most common diseases affecting adults. It is the most common chronic disease in children in the United States today and the fifth most common chronic disease in the United States overall. AR is estimated to affect nearly 1 in every 6 Americans and generates 2 to 5 billion in direct health expenditures annually.

Cancer Wikipedia

Cancer is a group of diseases involving abnormal cell growth with the potential to invade or spread to other parts of the body. These contrast with benign tumors which do not spread. Possible signs and symptoms include a lump, abnormal bleeding, prolonged cough, unexplained weight loss, and a change in bowel movements. While these symptoms may indicate cancer, they can also have other causes.

Oral cancer Wikipedia

Chewing betel paan and Areca is known to be a strong risk factor for developing oral cancer even in the absence of tobacco. It increases the rate of oral cancer 2.1 times through a variety of genetic and related effects through local irritation of the mucous membrane cells particularly from the areca nut and slaked lime. In India where such practices are common, oral cancer represents up to 40% of all cancers.
