

Modern Control Systems Lecture Notes University Of Jordan

Modern Control Systems Lecture Notes University Of Jordan **FREE** modern control systems lecture notes university of jordan design of control systems with the state variable point of view. The class of systems studied are assumed linear time-invariant (LTI) systems. Linear time-invariant systems are usually mathematically described in one of two domains: time-domain and frequency-domain. In time-domain, the system's representation is in the form of a differential equation.
